Input power 3 or 1 phase 400 V/AC 50 Hz 64 A or 32 A

Output power (optional)  
2×3-phase 400 V/AC 32 A (2×22 kW)  
2×3-phase 400 V/AC 16 A (2×11 kW)  
2×1-phase 230 V/AC 32 A (2×7,4 kW)  
2×1-phase 230 V/AC 16 A (2×3,7 kW)

Safety protection  
Charging cable locking  
Short circuit protection  
Leakage current protection  
Leakage current breaker auto reset (optional)

Other specifications  
Operational temperature -30 °C to +50 °C  
IP54 electrical enclosure rating  
IK10 vandalism-proof rating  
Smart energy meter (MID)  
Dimensions 150 × 350 × 670 mm  
Weight 21 kg  
UV resistant  
CE certified

# CityCharge Mini2 Electric Car Charging Station User Guide

## RFID authorization

## 2 × Type 2 charging sockets

Insert one end of the charging cable here

## LED display and LED sidebars

What do the colours mean?

- The charger is on standby, not charging
- Your electric car is charging
- (Blinking) Your electric car is fully charged
- Technical error

## Choose how you wish to use it!

The charger has a built-in RFID card reader, allowing you to start and finish charging only with a personal RFID card. In public or semi-public places, we always recommend using the charger with an RFID card to prevent unauthorized access to the charger.

*\* Depending on the car, it may be necessary to press the cable unlock button on the remote control or inside the passenger compartment to release the cable from the car charging socket.*

### Charging with an RFID card

- 1 Connect the charging cable to the car and the charger
- 2 Wave the RFID card at the location indicated on the charger to start charging; charging begins
- 3 To finish charging, wave the RFID card again; charging ends

### Charging without RFID

- 1 Connect the charging cable to the car and the charger
- 2 Charging begins automatically
- 3 To finish charging, stop it from the car and disconnect the charging cable from the car
